BASEMAPS

Baltic Sea up-to-date data for MSP

Maritime Spatial Planning

With BASEMAPS, maritime spatial planners in the Baltic Sea can access up-to-date and official transboundary maritime spatial planning data from the original source.

Baltic Marine Environment
Protection Commission

HELCOM

BASEMAPS contains MSP relevant up-to-date data published by official data providers.

BASEMAPS provides access to transboundary data from all countries around the Baltic Sea.

Maritime Spatial Planning

BASEMAPS allows users to view and download data/metadata published by national data providers through OGC open geospatial standards—WMS and WFS. It is also possible to access downloadable services and ArcGIS REST Map layers.

It is aimed for planners, data providers and authorities dealing with maritime spatial planning in the Baltic Sea.
