

VASAB Workshop

Data Availability for MSP: from Jungle to Structure

Practice and regional approaches on MSP data availability from international and European sea-basin perspective

Thursday 31 May 2018 | 11:45 - 12:45

Venue: Nessebar

Swedish Agency
for Marine and
Water Management

Data Availability for MSP

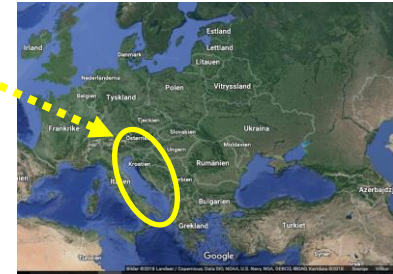

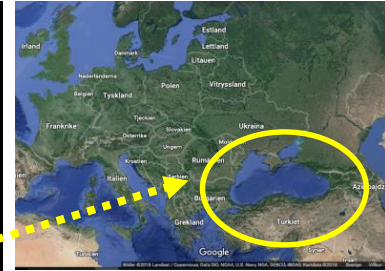

from Jungle to Structure

- Successful implementation of MSP depends on good quality data and information
 - Data quality, accessibility and availability are crucial when considering transboundary context
- important prerequisite for creating a coherent network of maritime spatial plans.

Goal with workshop

- Identify
- Share best practice
- Regional approaches on MSP data availability international and European sea-basin perspective

Global and European sea-basin perspective
