

European Maritime Day

Burgas 2018

REPUBLIC OF BULGARIA
Ministry of Transport, Information Technology
and Communications

EMD workshop «Data availability for MSP - from jungle to structure»

- Successful implementation of MSP depends on good quality data and information
- Data quality, accessibility and availability are crucial when considering transboundary context
>>> important prerequisite for creating a coherent network of maritime spatial plans.

What we need for dream come true:

- Political will to strengthen transboundary cooperation & coordination
- Engagement of stakeholders
- Use of existing e-infrastructure & tools
- Use of wisdom

NB!

Without **data** you cannot have an **information**, without information you cannot have a **knowledge**

Future MSP Data will be:

- 99% online
- Accessible via distributed information systems
- Harmonised & interoperable & easy-to-read
- More attractive in terms of content, functionalities and interface
