HORIZONTAL ACTION “SPATIAL PLANNING” IN EUSBSR FAMILY

LAND-BASED SPATIAL PLANNING

The Baltic Sea region – ‘Vision and Strategies around the Baltic Sea 2010’ – VASAB/HELCOM (2010) that was adopted as the basis for marine spatial planning in Tallinn in 1994. The VASAB long been Perspectives for the Terrestrial Development of the Baltic Sea region to avoid the detrimental effects of spatial planning and environmental and social sustainability. It also seeks to ensure that the planning is coherent across borders and that the planning should be coherent across the borders which entails close cooperation and that the planning should be coherent across the borders which entails close cooperation. The LTP concentrates on issues which require transnational solutions such as addressing spatial objectives, conditions and impacts of their actions. The Baltic Sea region is a mosaic of countries with diverse political systems, economic conditions, and cultures. In 2015 the Regional Baltic MSP Roadmap 2013-2020, adopted by the HELCOM Ministerial Conference in Helsinki, Finland on 26 May 2015, represents a platform for the development of maritime spatial plans throughout the BSR which are coherent across borders and that the planning should be coherent across the borders which entails close cooperation. In addition, the Guideline for the implementation of the EU MSP Directive, prepared by the EU Policy Committee on Maritime Spatial Planning (MSP) also aims to improve decision-making processes for integrated maritime management. The joint HELCOM-VASAB MSP Working Group, established in 2015, in the regional platform for cooperation between EU countries to ensure coherent MSP processes in the cross-border context and provide a framework for the EU MSP directive for EU countries in the Baltic Sea region. In 2015 the BSR MSP Data Expert Sub-group was established as an expert group under the BSR MSP Working Group (MSPWG) and its main objective is to support the sub-group to develop data, information and evidence available for MSP processes with regard to cross-border / trans-boundary planning issues. Geography: “Spatial Planning” is of key importance in ensuring consistency of actions and in maintaining an integrated approach in the Baltic Sea region. The Baltic Sea region is a mosaic of countries with diverse political systems, economic conditions, and cultures. In 2015 the Regional Baltic MSP Roadmap 2013-2020, adopted by the HELCOM Ministerial Conference in Helsinki, Finland on 26 May 2015, represents a platform for the development of maritime spatial plans throughout the BSR which are coherent across borders and that the planning should be coherent across the borders which entails close cooperation. The strategic goal of the Maritime Action is to draw up and apply a transboundary, ecosystem-based Maritime Spatial Plan throughout the BSR. The action is based on the principle that the principle that the purpose of the action is to develop a maritime spatial plan which is coherent across the borders which entails close cooperation.
